Introducing the HardiePlank® family by JamesHardie®

HardiePlank® family by JamesHardie® includes two weatherboard profiles, made from advanced material fibre cement. With an A2, s1 d0 fire rating, our boards are non-combustible and offer the best fire protection possible for any coloured facade board.

HardiePlank® weatherboard is a versatile, low maintenance facade available in a selection of 21 colours and two textures. It can be installed horizontally, vertically or diagonally as well as offering finishing in traditional overlap, open joint or hit and miss styles.

Engineered to deliver uncompromising performance and easy fitting

HardiePlank® VL is an easy to fit interlock weatherboard that ushers in a new era of contemporary exterior solutions. HardiePlank® VL weatherboard requires no support system during installation, saving valuable build time and costs. Plus with in-built climate protection and a 15 year warranty as standard, you can rest assured your project will stand the test of time.

Available in cedar finish, HardiePlank® VL weatherboard comes in a timeless colour palette to maximise architectural features, from graphical monochrome and pastels to muted greys. Suitable for both horizontal and vertical installation.
