of living

What's on your building?

Cedral is the ideal, low maintenance, rot-free alternative to traditional timber weatherboarding. With the visual appeal of natural timber, simplicity of installation and resistance to rot, the Cedral weatherboard range offers an attractive, low maintenance alternative to PVCu and timber. Cedral is available in a choice of two weatherboard applications: Cedral Lap and Cedral Click.

DIMENSIONS

	Cedral Lap	Cedral Click
Length	3600mm	3600mm
Width	190mm	186mm
Thickness	10mm	12mm
Weight per board	11.2kg	12.2kg

CEDRAL LAP

Cedral Lap is specially designed so that the planks are overlapped when installed creating a traditional, clapper-board aesthetic.

CEDRAL CLICK

Cedral Click is a flush fitting fibre cement tongue and groove cladding board. With the same performance benefits as traditional Cedral Lap.

MAINTENANCE

For minor soiling, washing with a mild household detergent or soft soap solution followed by rinsing with clear water is sufficient to maintain its appearance and colour.

Dependant upon location, Cedral should not require re-painting, however if it is decided to either change the Cedral colour or repaint, please contact the technical department for advice on 01283 501505.

Cedral touch up paint is available in 0.5 litre quantities in all colours. This should be used sparingly where there is damage to paintwork.

Any overspill should be removed immediately.

LITERATURE

All current product and technical literature can be downloaded from cedral.co.uk

SAMPLES

Samples are available for all of the products featured in this brochure and available to order from cedral.co.uk
